Press release

MDX Technology and Orchid Technology form partnership to offer combined solution

Combined solution addresses customer demand for alternative market data terminals with flexible access to a wider range of real-time market data feed providers.

Tokyo, London, 29th June 2012 -- MDX Technology (MDXT), a leading provider of vendor agnostic real-time market data connectivity solutions, and Orchid Technology, a leading provider of alternative market data terminals, today announced they had formed a strategic partnership to provide Orchid's *Jigsaw Terminal* integrated with MDXT's *Connect* platform.

"This is another important partnership for MDXT driven by customer demand for alternative cost effective market data terminals with the flexibility to select from a range of real-time market data sources. Currently we connect to Bloomberg, NYSE, Reuters, SunGard and TIBCO with a roadmap of 10 other providers including the leading data vendors in Asia", said Paul Watmough, CEO, MDXT.

Richard Gissing, CTO, MDXT, added "The combination of our high-performance market data interfaces with Orchid's terminal creates a much more powerful offering addressing the needs of a much wider audience."

"The partnership with MDXT will allow us to extend our products to a much wider range of data vendors' platforms. It will also give us the ability to utilise MDXT's Connect to offer more comprehensive solutions to our clients", said Serge Kimura, President, Orchid Technology.

Under the terms of the partnership, MDXT will promote the combined solution in Europe while Orchid will continue to focus its efforts in Japan.

About MDX Technology

Founded in 2010, MDXT is a vendor independent and innovative software development company. The company's focus is on delivering high performance, flexible, user friendly and cost-effective vendor agnostic real-time market data connectivity and data sharing solutions for the trading room environment. MDXT is deployed in prop traders, hedge funds, spread betters, Investment Banks and Inter Dealer Brokers as well as other software vendors in the US, EMEA and APAC. Typically the technology is being used to achieve: cost savings through rationalisation and replacement of legacy and premium apps; development simplification; and; performance improvements. Described by one tier 1 investment bank as "the best market data vendor and platform agnostic connectivity suite available on the market", MDXT has rapidly established itself as the market leader in its field.

About Orchid Technology

Orchid Technology KK is an independent, privately owned, software solutions provider. The company was founded in Tokyo in 1996 with the aim of producing a superior range of software applications, tailored for financial markets, based on Orchid's proprietary technology. Its clients include prominent brokerage institutions for stock trading and foreign exchange dealing, trading systems vendors and financial information providers. Orchid provides customised desktop solutions using the Jigsaw™ Platform, a component-based data delivery and display architecture. Totally independent from data vendors, Orchid's solutions are designed to be as flexible as possible, so that front-end display components are completely de-coupled from the underlying data delivery mechanism, giving clients the freedom to switch between vendors if desired, without impacting their users.
